OPERATIONAL FOCUS SOLUTIONS THAT WORK FOR YOUR BUSINESS

The purpose of Operational Focus is to provide information about what's going on (in process pictures) so everyone knows in almost real time.

Where every employee can see the flow of value to the customer, where they fit in that flow and then fix that flow when it breaks down.

Every area in an organisation can benefit from Operational Focus.

All plants will be completely confident of their available capacity, hourly throughput objectives will be achieved as a matter of routine, unplanned and unpredicted equipment failure of key plant items will be a thing of the past and quality loss containment actions discussed each day at an item by item level not as trends.

How visible are your problems?

Who's fixing them and what's the status of the repair? When will the copier be back on line? When will the production line be back on line? What's the cost of the loss? What could be done better next time?

So many questions, so little time....

Call us now to discuss how these and other questions can be answered.....ask about 'Visibly Operational Focus'.
